Weekly Coal Production

Energy Information Administration
Washington, D C

Contains Supplementary Data

Production for Week Ended:
March 9, 1985

Published:
March 15, 1985

Preface

The WCP

The *Weekly Coal Production* (WCP) provides weekly production estimates of U.S. coal by rank, as well as supplementary data which are published twice a month. Supplement 1 includes monthly statistics on U.S. coal production and aggregated annual historical data on coal supply and demand, consumption, stocks, imports, and exports. Supplement 2 contains monthly data covering electric utility coal consumption, stocks, and receipts; and coal imports and exports.

This publication is prepared by the Coal Division; Office of Coal, Nuclear, Electric and Alternate Fuels; Energy Information Administration (EIA) to fulfill its data collection and dissemination responsibilities as specified in the Federal Energy Administration Act of 1974 (P.L. 93-275) as amended. *Weekly Coal Production* is intended for use by industry, press, State and local governments, and consumers. Other publications that may be of interest are the quarterly *Coal Distribution Report* and the *Quarterly Coal Report*.

General information about this publication may be obtained from Robert Harris, Chief, Data Systems Branch, Ann Ducca, or Judith Wood. For specific information on the contents of this publication contact the National Energy Information Center (NEIC) at (202/252-8800).

Highlights

Production of bituminous coal and lignite in the week ended March 9, 1985, as estimated by the Energy Information Administration, was 17,981,000 short tons. This was an increase of 24,000 short tons or 0.1 percent from production in the previous week. Production in the corresponding week of 1984 was 18,072,000 short tons. Bituminous coal and lignite production from January 1 through March 9, 1985 totaled 157,649,000 short tons, and from January 1 through March 10, 1984 totaled 167,262,000 short tons.

Production of Pennsylvania anthracite in the week ended March 9, 1985, as estimated by the Energy Information Administration, was 79,000 short tons, the same as production in the previous week. Production in the corresponding week of 1984 was 62,000 short tons. Anthracite production from January 1 through March 9, 1985 totaled 692,000 short tons, and from January 1 through March 10, 1984 totaled 621,000 short tons.
